Introduction :

Please note that the pre-release system (ACI) will be applied experimentally starting from 01/04/2021 to 30/06/2021 as a trial period and starting from 01/07/2021

What is an ACI system ?

It is a system for advance information on shipments that enables customs administrations to process advance information in the risk program, allowing for quick

Is this system new in Egypt or has international standards ?

This system is implemented in accordance with the Agreement on International Trade Security and Facilitation Standards (SAFE), as well as the General Agreement for

Who is in charge of the system?

The person responsible for this system is the importer, the owner of the goods, or an agent such as customs brokers

Procedural steps for obtaining the initial registration of the ACI system: -**Role of the Cargo Owner , or customs brokers**

- 1- The importer registers on the window www.nafiza.gov.eg for one time, noting that the required data is a registration form (a copy of which is attached) and he has
- 2- You must register in one of the companies to give the right to an electronic signature, such as (Egypt Clearing House Fouad Street or Egypt Trust in Amiriya)
- 3- The window sends the password and user name of the company via the e-mail registered in the form
- 4- The window is entered and inserted - the importer's data, especially the number of the dealers, and the number is mentioned - the source data - the commodity data (item) as follows: - The customs tariff item including the HSCODE by applying the integrated tariff and a ten-digit code - the branches data others From the shipment data.
- 5- The initial invoice is registered on the window site by the importer or the clearance office
- 6- Within 48 hours of registration, the window will send an initial number (ACID) to the importer
- 7- The importer sends the initial number (ACID) to the foreign exporter to place it in the invoice + package statement + certificate of origin + bill of lading (and all
- 8- After notifying the foreign exporter to the Egyptian importer, the exporter uploads the documents to the Cargox websites that send the documents including the
- 9- The customs certificate can be opened after the electronic signature of the importer or a clearing agent, payment of customs duties, receipt of release, and waiting for the arrival of the shipment to complete the inspection and inspection procedures and the customs declaration (pre-clearance)

Role of the Exporters abroad:

- 1- All exporters abroad must register on the website <http://cargox.digital/create-an-account> in order to receive and send invoices for shipments through it upon
- 2- After the foreign source completes the issuance of all the documents, they are uploaded to the CARGOX website with the source's identification and data Khy -
- 3- The initial number ((ACID) is received from the importer and placed in the invoice + package statement + certificate of origin + bill of lading (and all documents) of
- 4- The exporter uploads the shipment documents on the Cargox platform (invoice - package list - certificate of origin and any other documents)
